

ADA2 – EASY ADABAS MIGRATION

SYNCHRONIZING DATABASES IN REAL TIME

Risk reduction

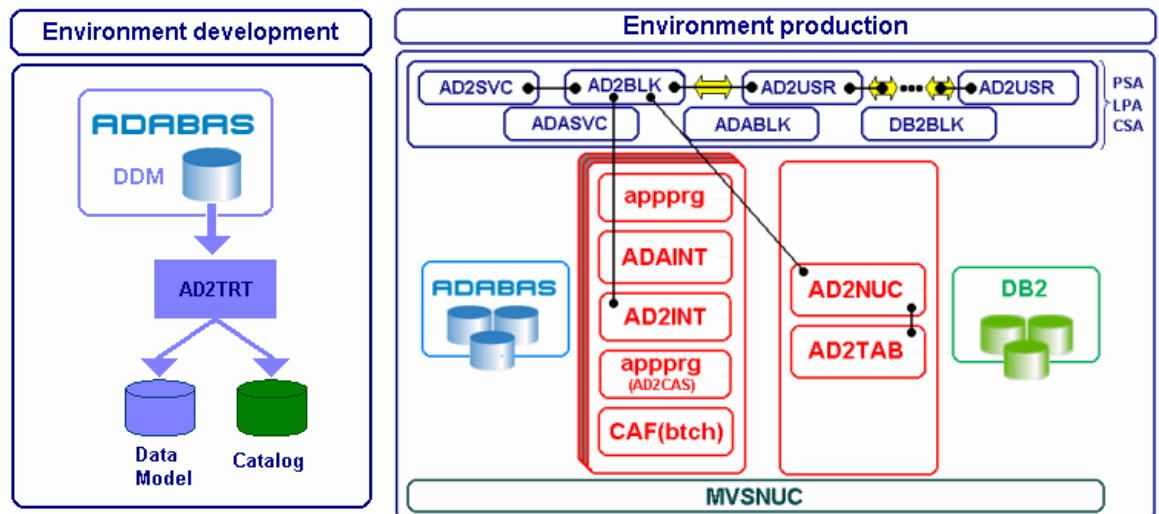

Productivity

Quality

Low cost

The innovative and exclusive solution of the product ADA2 allows ADABAS table mirroring and migration to relational database technologies (DB2, Oracle, SQL-Server, etc).

ADA2 performs extraction of data from ADABAS tables to other technologies in real time, eliminating the need to modify code. ADA2 automated processes improves the ROI of systems migration and integration projects, reducing the costs of expensive legacy systems and leveling down the man power expertise needs.

ADA2 - Flexibility

Languages

Systems developed in Natural, PL/I, Cobol, etc, are kept native;

Tables

ADABAS tables can be mirrored/migrated individually.

ADA2 - Reliability

Safety

Transactions are consolidated in remnant memory (DIV - data in virtual - a resource of the IBM operational environment);

Performance

ADA2 does not introduce overhead to the application;]

Integrity

Manages all the changes performed in the databases

ADA2 - Architecture

Standard

Uses resources of the IBM operational environment;

Structure

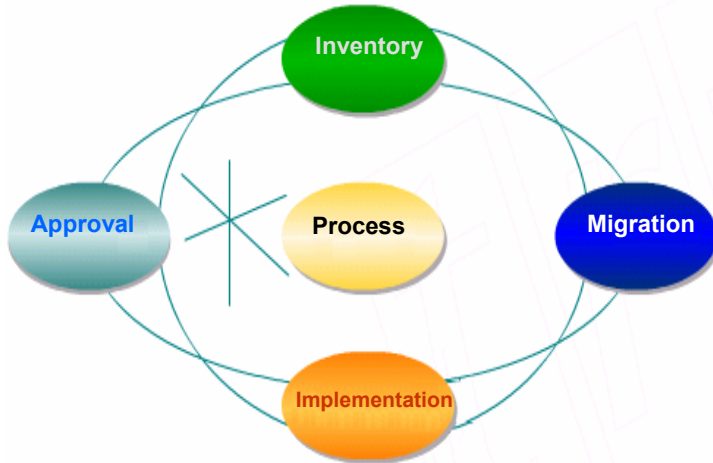

Developed using sub-task with specific functionality;

AmazonTech

LEGACY MIGRATION SERVICES

Migration Technology

Our experience in data migration enabled the development of automated technology tools to support data conversion projects. With few manual coding requests, the migration is free of human errors, faster, and high quality

We offer a suite of converters of languages and data bases:

Software		
Origin	Destiny	Automation
ADABAS	DB2	100%
RPF	REXX	90%
Cool:Gen	Cobol	90%
Natural	Cobol	80%
Natural	Visual Age	85%
CA-Telon	Cobol	80%
Cobol IMS-DB	Cobol-DB2	70%
CSP	Cobol	80%

- Technologies rationalization;
- Integration with ERP, CRM and other software solutions;
- System conversion projects
- Automated product based systems migration
- Migration planning
- Change management

AmazonTech's continued superiority in the marketplace is driven by the never ending vision of our engineering and executive teams, who consistently focus on excellence and customer satisfaction.

We focus on providing the complete solution to our customers, including software development, project management and systems integration. Contact us today and let AmazonTech show how we can help you realize your vision.
